

Sensations Of Flight

Flesh Hook Suspension: Grinder & Jet

3.00 - 4:30 pm Friday, 5th June 2015 - Building 201, Room 309B
(diagonally opposite the main entrance to the School of Built Environment, which is designated as level 3)

In an age of information overload and proliferating images, the body is immersed and seemingly disembodied in video and virtual environments. Scarification, body implants, body modification and body suspensions re-assert physical experience and affect in a world of gravity, mass and weight. The body is seen as a site for experimentation and testing the limits of its form and function.

Grinder and Jet are members of a group of multi-disciplined practitioners and flesh hook suspension enthusiasts committed to providing professional assistance to people wanting to explore the art form of hook suspension. The group has grown into a collective of aspiring artists with a shared passion for self-exploration and the dedication to creating art using the human body.
